PROFESSIONAL EXPERIENCE

SLK Group Solutions Delivered — Junior ERPNext Developer

May 2026 - Present

- Develop and maintain ERPNext applications and custom business workflows based on organizational requirements.
- Customize ERPNext modules, DocTypes, forms, validations, and business logic using Python and JavaScript.
- Develop and maintain custom reports and SQL-based reports to support business and management requirements.
- Implement workflow configurations and process automation to improve ERP operations.
- Develop accounting-related customizations and support finance processes within ERPNext.
- Implement procurement-related customizations and business logic for purchasing workflows.
- Provide ERP application support, troubleshoot functional and technical issues, and resolve production-related problems.
- Perform ERP server maintenance and support deployment, configuration, and application-level troubleshooting.
- Work with business users to understand requirements and implement appropriate ERPNext solutions.

Pontus Pack Private Limited — Graduate Engineer Trainee / ERP Developer

April 2025 - May 2026

- Developed and customized ERPNext modules for manufacturing, inventory, service, and business workflows.
- Developed custom DocTypes, child tables, validations, workflows, and role-based functionality using Frappe Framework.
- Built Python backend logic and JavaScript customizations to automate ERP processes and improve user workflows.
- Developed custom reports and SQL queries for operational and management requirements.
- Implemented business validations and document-level automation across ERPNext transactions.
- Worked on service management workflows including service requests, vehicle inspections, job cards, parts usage, and billing.
- Customized ERPNext documents and processes to meet manufacturing and inventory business requirements.
- Troubleshot ERPNext application issues and supported users in resolving functional and technical problems.

Yangoos Technology — SDE Intern

July 2023 - August 2023

- Developed small modules for an e-commerce application.
- Assisted with UI enhancements, bug fixing, and data analysis.
- Gained experience with Git-based software development workflows.

KEY PROJECTS

Bike Service Management ERP — ERPNext / Frappe

- Developed an ERP-based service management solution covering service requests, vehicle inspections, job cards, parts usage, billing, and service completion.
- Implemented custom DocTypes and child tables to manage service operations.
- Developed workflow automation and business validations using Python and JavaScript.
- Implemented role-based access and field-level controls for Service Advisors, Technicians, Vehicle Inspectors, Cashiers, and other users.
- Developed reports and process automation to improve service operations and tracking.

Sign Language Recognition using Machine Learning

- Developed a real-time gesture recognition system using TensorFlow and OpenCV.
- Trained and evaluated the model using labeled gesture datasets.
- Optimized the model for real-time gesture detection and inference.
